### Notes to the Financial Statements

#### Note 1 – Significant accounting policies

The financial statements have been prepared in accordance with legal and regulatory requirements and in accordance with accounting principles generally accepted in Luxembourg, including the following significant policies:

#### a) Valuation principles

The Net Asset Value of each Class within each subfund (expressed in the Reference Currency of the Class) is determined by aggregating the value of securities and other permitted assets of the Company allocated to that Class and deducting the liabilities of the Company allocated to that Class. The Net Asset Value per Share in each Class will be calculated by dividing the net assets attributable to that Class by the total number of Shares outstanding of that Class and by rounding the resulting amount up or down to two (2) decimal places.

The total net assets of the Company will be expressed in the Base Currency and correspond to the difference between the Company's assets and its liabilities. For the purpose of this calculation, any portion of the net assets of a subfund that is denominated in another currency, is converted into the Base Currency at the prevailing exchange rate on the Valuation Day.

The assets of each Class within each subfund are valued as of the Valuation Day, as defined in the relevant subfund Particulars, as follows:

- shares or units in open-ended undertakings for collective investment, which do not have a price quotation on a Regulated Market, will be valued at the actual Net Asset Value for such shares or units as of the relevant Valuation Day, failing which they shall be valued at the last available Net Asset Value which is calculated prior to such Valuation Day. In the case where events have occurred which have resulted in a material change in the Net Asset Value of such shares or units since the last Net Asset Value was calculated, the value of such shares or units may be adjusted at their fair value in order to reflect, in the reasonable opinion of the Board of Directors, such change;
- the value of securities (including a share or unit in a closed-ended undertaking for collective investment and in an exchange traded fund) and/or financial derivative instruments which are listed and with a price quoted on any official stock exchange or

traded on any other organised market is based on the closing price. Where such securities or other assets are quoted or dealt in or on more than one stock exchange or other organised markets, the Board of Directors shall select the principal of such stock exchanges or markets for such purposes;

- shares or units in undertakings for collective investment the issue or redemption of which is restricted and in respect of which a secondary market is maintained by dealers who, as principal market-makers, offer prices in response to market conditions may be valued by the Board of Directors in line with such prices;
- the value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors may consider appropriate in such case to reflect the true value thereof;
- the financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market will be valued in a reliable and verifiable manner on a daily basis and verified by a competent professional appointed by the Company;
- swap contracts will be valued according to generally accepted valuation rules that can be verified by auditors. Asset based swap contracts will be valued by reference to the market value of the underlying assets. Cash flow based swap contracts will be valued by reference to the net present value of the underlying future cash flows;
- the value of any security or other asset which is dealt principally on a market made among professional dealers and institutional investors shall be determined by reference to the last available bid price;
- liquid assets and Money Market Instruments may be valued at mark-to-market, mark-to-model and/or using the amortised cost method;
- the value of Money Market Instruments neither listed or dealt in on a stock exchange nor dealt in on any other Regulated Market shall be based on the nominal value plus any accrued interest or an amortised cost basis;
- any assets or liabilities in currencies other than the relevant currency of the subfund concerned will be converted using the relevant spot rate quoted by a bank or other responsible financial institution;

- in the event that any of the securities held in the Company portfolio on the relevant day are not listed on any stock exchange or traded on any organised market or if with respect to securities listed on any stock exchange or traded on any other organised market, the price as determined pursuant to sub-paragraph (Temporary suspension) is not, in the opinion of the Board of Directors, representative of the fair market value of the relevant securities, the value of such securities will be determined prudently and in good faith based on the reasonably foreseeable sales price or any other appropriate valuation principles;
- in the event that the above mentioned calculation methods are inappropriate or misleading, the Board of Directors may adopt to the extent such valuation principles are in the best interests of the Shareholders any other appropriate valuation principles for the assets of the Company;
- in circumstances where the interests of the Company or its Shareholders so justify (avoidance of market timing practices, for example), the Board of Directors may take any appropriate measures, such as applying a fair value pricing methodology to adjust the value of the Company's assets; and
- If after the Net Asset Value per Share has been calculated, there has been a material change in the quoted prices on the markets on which a substantial portion of the investments of the Company attributable to a particular subfund is dealt or quoted, the Company may, in order to safeguard the interests of the Shareholders and the Company, cancel the first valuation and carry out a second valuation, provided that the first valuation has not yet been published. In the case of such a second valuation, all issues, conversions or redemptions of Shares dealt with by the subfund for such a Valuation Day must be made in accordance with this second valuation.
- b) Valuation of forward foreign exchange contracts
  The unrealized gain (loss) of outstanding forward foreign exchange contracts is valued on the basis of the
  forward exchange rates prevailing at valuation date.
  Realized or unrealized gains or losses are recorded in
  the statement of operations.
- c) Net realized gain (loss) on sales of securities The realized gains or losses on the sales of securities are calculated on the basis of the average cost of the securities sold.

#### d) Conversion of foreign currencies

Bank accounts, other net assets and the valuation of the investments in securities held denominated in currencies other than the reference currency of the different subfunds are converted at the mid closing spot rates on the valuation date. Income and expenses denominated in currencies other than the currency of the different subfunds are converted at the mid closing spot rates at payment date. Gain or loss on foreign exchange is included in the statement of operations.

The cost of securities denominated in currencies other than the reference currency of the different subfunds is converted at the mid closing spot rate prevailing on the day of acquisition.

e) Accounting of securities' portfolio transactions The securities' portfolio transactions are accounted for the bank business day following the transaction dates.

#### f) Income recognition

Dividends, net of withholding taxes, are recognized as income on the date upon which the relevant securities are first listed as "ex-dividend". Interest income is accrued on a daily basis.

#### g) Combined financial statements

The combined financial statements of the Company are expressed in EUR. The various items of the combined statement of net assets, the combined statement of operations and the combined statement of changes in net assets as of 31 March 2024 of the Company are equal to the sum of the corresponding items in the financial statements of each subfund.

The following exchange rate was used for the conversion of the combined financial statements as of 31 March 2024:

EUR 1 = USD	1.080000
